

VAC 800-EC

Building site air purifier, dust class M

Order no. 477745

GTIN 4030293213302

- + For cleaning air during renovation and demolition work in very hazardous black areas. To protect users, fine respirable dust is filtered from the air by means of coarse, fine, M/H filters and activated carbon filters
- + Dust is removed directly from wherever it is produced. A low pressure regime can be achieved by installing mobile plastic partitioning and air locks, thus preventing dust from spreading outside the work area.
- + Volume flow monitoring and variable volume flow setting via rotary switch. The low pressure required can thus be freely adjusted and adapted to the working environment
- + Brushless motor with greater efficiency and a longer service life
- + Low operating noise, with night function
- + Compact design, lightest tool of its class with 125 Ø mm exhaust air flow system
- + High air flow
