MH-R D225

Rotary sanding head with edge segment

Order no. 535512

GTIN 4030293293526

Allows processing of surface transitions from the wall to the ceiling. The rotation of the edge sanding head is induced by the movement of the tool, without interruption of the sanding process. This results in a 5 times faster edge processing. The integrated sliding edges on the sanding head prevent damage to the contact surfaces on the wall and ceiling.

Technical data

Sanding head type	Segment sanding head
Packaging unit	1 Cont.
